**ABOUT ME:** I am a front-end software engineer, I also have knowledge of some back-end technologies such as PHP, but in fact my main skill is front-end.

I have more than 6 years of experience, I have a bachelor's degree in Information Systems, a degree lasting 4 years, in my case it took me 4 and 6 months because I had a small problem I had to leave college for an entire semester, but I graduated with excellent grades at the end of 2020/21 at Estácio de Sá university.

I have some complementary skills that I developed during the period I worked in some companies, which are: Paid Ads Traffic Management, SEO and Digital Marketing for online sales.

I stand out for my soft skills: Creativity, clear communication, commitment and my ability to manage my emotions even under great pressure.

- » **Front-end Technologies:** JavaScript | TypeScript | React.js | Tailwind CSS | HTML5 | CSS3
- » **Back-end Technologies:** PHP and Node.JS
- » **CMS:** WordPress

## ACADEMIC EDUCATION

**Graduate in:** Information Systems  
**University:** Estácio de Sá University  
**Period:** 2016 - 2021

**About:** The Information Systems course, lasting 4 years (8 terms), introduces our students to disciplines such as Mathematics, Differential Calculus and Algorithms for a better understanding of the theories applied in this sector. In the specific part of the course, students learn about programming language, databases and software engineering. The architecture of computer networks is also among the contents taught. The greatest demand for professionals is in the big centers, which concentrate the biggest software developers. It is mandatory to present a course completion project and complete a minimum of 300 hours of internship.

**Skills:** Software project management · Database · Responsive Web Design · Agile methodologies in software development · Software development
